Evolution Through Innovation

Introducing the Sasquatch™ Hangerless Gutter Protection System, the newest, smartest, and most durable gutter protection known to man—or beast.

Sasquatch is the latest game-changing innovation from E-Z Gutter Guard, a brand that has defined gutter protection for over 40 years through unmatched quality, design, and service. E-Z Gutter Guard now redefines the industry with gutter protection that combines superior strength, ease of installation, and optimal water and debris management.

Sasquatch will change how you install gutters.

There are no hangers. Sasquatch is so strong, it does double duty as a superior gutter protection product that provides continuous stability and durability across the entire length of your newly installed gutter system.

Here’s how it works.

Sasquatch is installed on the ground and WITH the gutter. Sasquatch locks securely into the front hem of the gutter and is secured through a patent-pending rear screw ledge that allows screws to be pre-started on the ground. This locks Sasquatch to the gutter, making for easy and direct fascia attachment. The result is unmatched strength, durability, and ease of installation.

Sasquatch at a Glance.

- Hangerless, continuous gutter protection that won’t rust, buckle, or warp under the weight of snow, ice, or ladders.
- Installs with your gutter, for reinforced strength from end to end.
- Available in black, 5” and 6” widths, and 7.5’ lengths.
- Solid, perforated, and painted .019” high-strength aluminum.
- Also available in .022” heavy-duty Arctic Extreme.
- 30 pieces per box, 225 linear feet, with screws included.
- Carries a lifetime, limited, transferrable warranty.
- Meets critical ASTM 2768 fire-resistance standards for flame spread.

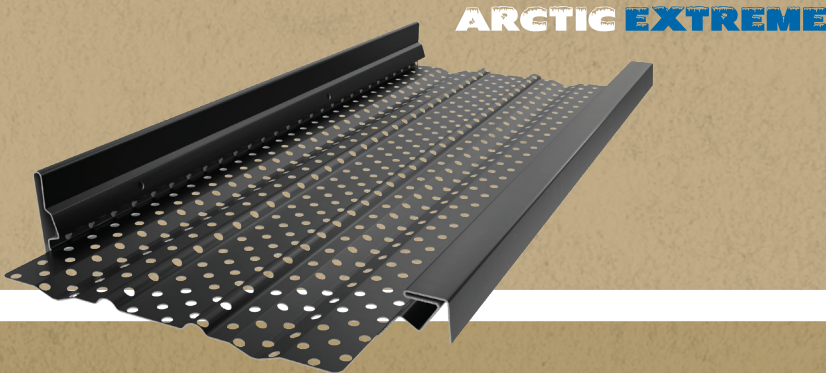

A Complete System For All Conditions

Ultra-Heavy Loads:

Sasquatch Arctic Extreme

For climates with heavy snow and ice loads, Sasquatch is available in .022” high-strength, heavy-duty aluminum.

Sasquatch Accessories:

Fine Debris Filter

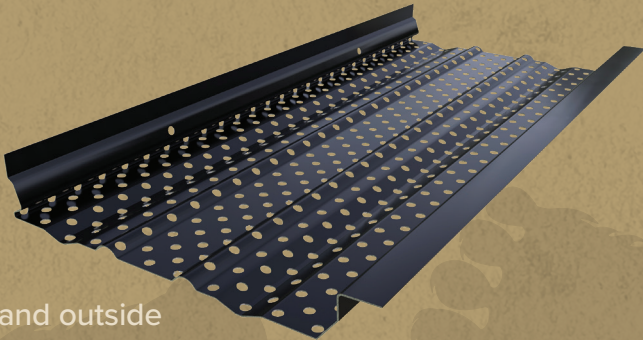

In areas where fine debris, such as pine needles and oak pollen are prevalent, simply install the Fine Debris Filter over Sasquatch for complete protection and added strength.

Meets critical ASTM fire-resistance standards 2768 & 2886 for flame spread and ember intrusion.

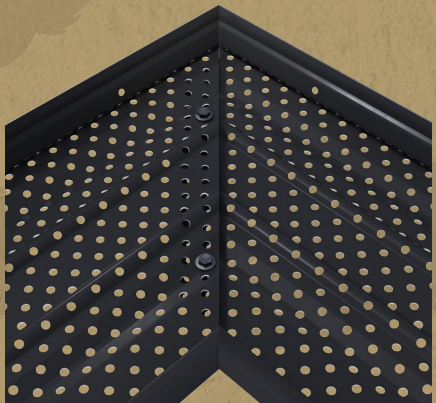

Access Covers

Allows for easy access for maintenance around outlet holes. These 14” panels are easy to install with Sasquatch using supplied, black, 3/8” screws.

Pre-Cut Mitered Corners

Pre-cut 45 degree angles for both inside and outside miter applications. Simply notch and attach to each other, and to Sasquatch, and fasten through the top hem and rear of the gutter for strength and durability.

Dare to Challenge Sasquatch!

KNOWLEDGE. EXPERIENCE. FAMILY.

With a combined 250 years forming and hanging gutters throughout the Midwestern United States, the Ealer family of Saint Clair, Missouri and its business, Midwest Enterprises, set out over 40 years ago to design a gutter protection solution that actually works.

With over 25 profiles and dozens of patents, E-Z Gutter Guard has steadfastly become a leader throughout North America with a very direct mission: create high quality, easy-to-install, no call-back products that help protect homes from damaging water infiltration and fire risk - backed by the best customer service in the industry.

It doesn't stop there. Through advanced design and with the clear understanding that not all gutter protection is one-size-fits-all, Midwest Enterprises remains at the cutting edge of innovation and performance, committed to looking for new and better ways to protect homes and families for generations to come.
